WORK EXPERIENCE

IDZ Digital pvt ltd   **WFH**

Game Developer   *Oct 2024 - Feb 2025*

- Spearheaded the development of 10+ high-quality mobile games using Godot Engine, Unity 2D/3D, and Android Studio, resulting in a 35% increase in user engagement and significantly enhancing the company's gaming portfolio.
- Optimized game performance by implementing mobile-specific techniques, achieving 40% faster load times, 60+ FPS stability, and 100% crash-free sessions across Android devices.
- Led the integration of AdMob, strategically placing ads to boost monetization; increased in-game ad revenue by 20% while maintaining a 4.5+ user rating for gameplay experience.
- Collaborated with cross-functional teams including designers, artists, and developers, facilitating rapid prototyping and deployment of 5+ games within 5-month cycles.

Spareprovider.com   **Faridabad, Haryana**

Software Trainee   *Jan 2024 - Jul 2024*

- Developed an Employee Management System using Python, Django, RESTful APIs, Bootstrap, and MongoDB, MySQL, enabling real-time data access, updates, and predictive insights with up to 98% accuracy.
- Designed an interactive dashboard that boosted productivity by 85% and reduced absenteeism by 72%, through efficient data preprocessing and real-time performance tracking

PROJECT EXPERIENCE

University Minor Project   **Faridabad, Haryana**

AR Indoor Navigation Application   *Sep 2023 - Dec 2023*

- Created an AR Indoor Navigation project using C#, AR, Unity, ARcore, and AI navmesh to produce a 3D map of the location, achieving a 95% accuracy in wayfinding.
- Implemented AI navmesh for efficient route planning, resulting in a 90% reduction in navigation errors and significantly enhancing user experience within indoor environments.

University Minor Project   **Faridabad, Haryana**

Stock Prediction System   *Feb 2022 - Apr 2022*

- Developed a basic Stock Price Prediction System using Python, with data collected from Yahoo Finance using the yfinance library.
- Applied Linear Regression from sci-kit-learn to predict future stock prices based on historical trends; used matplotlib to visualize the predictions.

Personal Project   **Faridabad, Haryana**

portfolio website   *May 2025 - Jun 2025*

- Built a responsive personal portfolio website using HTML, CSS, JavaScript, React, and Tailwind, showcasing game and software projects with smooth animations, interactive previews, and mobile-first design.
- Implemented dark/light/system theme toggling and AOS scroll animations, enhancing visual appeal and aligning with user accessibility preferences.
- Redesigned the Resume section with a glowing scroll-trail effect and eliminated mobile overflow issues, improving user experience across all devices.
